SUMMARY

Full-stack software engineer, backend-focused on C# and .NET, with over two years building a multi-tenant ERP and e-invoicing platform used by ~200 Italian companies. Designed and led the modular .NET 8 API replacing its legacy core: clean architecture, CQRS, GraphQL and REST over PostgreSQL, with Roslyn source generators that cut new-entity code from 10+ files to ~4.

EXPERIENCE

Leonardo Web S.r.l. Piedmont, Italy · Remote
Full-Stack Software Engineer Feb 2025 - Sep 2026
Software Engineering Intern Jul 2024 - Jan 2025

Part-time during term (20 h/week), full-time in summers, alongside the degree.

- Designed ~90% of the architecture and led development of the modular .NET 8 API replacing the legacy ASP.NET backend of a multi-tenant ERP and e-invoicing platform used by ~200 Italian companies. Live in production, serving authentication and the full accounting module; all entities move over by end of 2026.
- Built database-per-customer multi-tenancy behind a YARP gateway that routes each request by JWT claim to per-customer hosts, so customer-specific features (7 customization modules) ship without redeploying the shared API.
- Wrote 12 Roslyn source generators (command handlers, validators, GraphQL queries, HotChocolate filter and sort types) plus analyzers and code fixes that enforce the architecture, cutting a new entity from 10+ hand-written files to ~4.
- Hardened the PostgreSQL schema (missing primary keys, foreign keys and indexes) across ~200 customer databases, with middleware that migrates each customer's database on its first request.
- Onboarded and mentored new developers as the team grew from 2 to 5: assigned tasks, paired on the codebase, and wrote the architecture documentation new hires start from.

Maggioli S.p.A. Italy
Software Development Intern 2022, 2023

- Two one-month school work placements (PCTO): built a log aggregator for all company projects and a metrics system (2022), then shipped fixes and features across frontend and backend (2023).

PROJECTS

lorenzomarchisio.me · Personal website Mar 2025 - Present

- Astro site on Cloudflare Pages with a server-side contact API (Resend, per-IP rate limiting, honeypot) and an automated photo pipeline: Swift watermarking, WebP encoding, EXIF and GPS stripping, thumbnails.

Multi-account email client · Diploma project 2024

- Flutter mobile app and Angular + Tauri desktop app, with all mail logic (IMAP/SMTP send and receive) written in Rust. OAuth sign-in; Gmail, iCloud and custom IMAP/SMTP accounts.

SKILLS

Backend: C#, .NET 8, ASP.NET Core, EF Core, SQL, PostgreSQL, clean architecture, CQRS (MediatR), multi-tenancy, YARP, Roslyn source generators, GraphQL (HotChocolate), REST/OpenAPI
Web and mobile: TypeScript, JavaScript, Angular, React, Astro, Blazor, Tailwind CSS, Bootstrap, shadcn/ui, Flutter
Cloud and DevOps: Docker, Cloudflare, Linux, Git, Oracle Cloud Infrastructure (certified) · **Testing:** xUnit, Playwright
AI-assisted development: Claude Code, OpenAI Codex for research, documentation and automating repetitive work

EDUCATION

BSc Computer Engineering · Politecnico di Torino 2024 - 2028 (expected)

IT Diploma · IIS G. Vallauri, Fossano · 86/100 2019 - 2024

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Architect Associate · Oracle · Sep 2025
Oracle Cloud Infrastructure 2025 Certified Foundations Associate · Oracle · Sep 2025

LANGUAGES

Italian: native · English: fluent, full professional proficiency (Cambridge B2 First)

ACHIEVEMENTS AND VOLUNTEERING

Gara Nazionale di Informatica, national finalist · 2023. National computer science competition for technical schools.
TEDxKULeuven, volunteer crew · 2026. Venue setup, event video recording, guest handling.
